SEEDS
Yilgarn Seeds Organic Heirloom Open Pollinated Seeds Vegetables, Herbs and Multi-use Plants Grown and Harvested exclusively from our Permaculture Gardens.

ASIAN GREENS - BOK CHOI
Sow Spring to Autumn.
Grown for the broad white leafstalks which are widely used in Chinese stir-fries. Leafstalks should be picked often, like silverbeet. Small compact plant, very easy and quick to grow. Matures after 60 days and has excellent resistance to bolting.
SKU: ASIA-BOK [Seeds/pkt: 100]

ASPARAGUS - MARY WASHINGTON
Sow anytime.
Grown from seed, it's best left to grow for a full two years to develop a crown before harvesting. Once harvesting begins plants shouldn't be visible except for shoot which is usually harvested when 150-200mm long. Check everyday during spring-summer harvest time as they can grow >100mm a day. This variety holds a tighter bud longer than other varieties with heavy uniform yields.
SKU: ASPA-MAR [Seeds/pkt: 50]

ASPARAGUS PEA - PALESTINIAN
Sow Autumn.
Ground covering annual with delightful red flowers. Pods to 50mm wide are eaten fresh with a taste like asparagus and peas. Native to the mountains of Palestine where children take pride in finding large patches. Drop seeds into boiling water and soak for 24 hours before planting. Plant swollen seeds. Repeat for non swollen seeds.
SKU: ASPP-PAL [Seeds/pkt: 60]
**BASIL - EAST INDIAN CLOVE**

Sow Spring  
(In Geraldton, Autumn to Spring).  
Drought and wind tolerant, this 1.5m tall perennial plant's leaves are used as a clove substitute. It is particularly good in Indian curries.  
Extremely useful in gardens, its strong aroma confuses insects and they have trouble finding plants to eat.  

SKU: BASI-EAS [Seeds/pkt: 60]

---

**BASIL - SWEET GIANT-LEAVED**

Sow Spring.  
Always sow after the shortest day to prolong flowering and encourage leafy growth. Never has picking basil leaves to make pesto been quicker. This hardy variety has slightly wavy green leaves several times larger than common sweet basil.  
Constant tipping of flowers from plants will promote more leaves. This annual is well-suited for growing in balcony pots.  

SKU: BASI-SWE [Seeds/pkt: 120]

---

**BEAN - BLACK VALENTINE**

Sow Autumn - Winter.  
Rare heirloom variety. A prolific producer of round stringless, snap green beans. This compact bush can also be used as a dried bean. Does well in the Geraldton region. Does not like hot summers.  

SKU: BEAN-BVA [Seeds/pkt: 40]

---

**BEAN - FRANCO'S GREEN BEAN**

Sow Spring  
(In Geraldton, sow Autumn).  
A white seeded variety of green bean whose pods are best eaten when young. A vigorous climber with yellow flowers and a good seed set. Pods to 200mm long.  

SKU: BEAN-FRA [Seeds/pkt: 40]
BEAN - FRENCH EPICURE
Sow Spring. (In Geraldton, early Autumn).
This is a highly productive stingless green bean. If pods are left to dry, white seeds can be eaten as dried beans.
Bushes exhibit good heat tolerance. Proven to grow well on sandy soils.
SKU: BEAN-FRE [Seeds/pkt: 40]

BEAN - GIANT OF STUTTGART
Sow Spring (In Geraldton, Autumn).
A vigorous stringless climbing bean with white seeds. Pods up to 26cm with fine flavoured high quality green bean. This heavy yielding plant crops over a long period.
SKU: BEAN-GOS [Seeds/pkt: 40]

BEAN - HALF WHITE RUNNER
Sow Spring
(In Geraldton, Autumn-Spring).
60 Days to maturity. Grows to 1.5m. Beans can be used when young and green as snap beans or shell beans when older.
Vigorous productive variety with white seeds. Has potential to be a good market gardening variety.
SKU: BEAN-HAL [Seeds/pkt: 40]

BEAN - HAWKESBURY WONDER
Plant Spring
(In Geraldton, plant Autumn)
This is a bush bean which produces screeds of green flat beans up to 18cm in length. Tremendously successful in Geraldton through the winter growing period as it is cold tolerant. This variety has lilac flowers and seeds are red. Known to be resistant to fusarium wilt and bacterial diseases.
SKU: BEAN-HAW [Seeds/pkt: 40]
BEAN - STALEY'S SURPRISE
Sow early Autumn or early Spring. Sprawling dwarf variety capable of producing a second flush after picking 18cm long pods holding large narrow variegated purple-ivory coloured seeds. Eaten as a green bean. Suitable for growing in pots. Bred in 1880s East Gippsland, Victoria by Arthur Staley exhibits good tolerance of cooler temperatures.
SKU: BEAN-STA [Seeds/pkt: 40]

BEAN - SUNSEEKER
Sow early Spring – Summer (In Geraldton, Winter-Spring). This climbing bean has green pods that if harvested young with be stringless. The pod is flat with a slight curl on the end with white seeds. This is a cold tolerant bean that performs well even if planted early spring. Beans will need a climbing frame or trellis
SKU: BEAN-SUN [Seeds/pkt: 40]

BEAN - YELLOW WAX
Sow Spring (In Geraldton, Autumn to Spring) Dwarf/semi-vining bean growing to 400mm tall. Has yellow shiny wax coated pencil pods. Sometimes referred to as Butter Beans, pick when pods are yellow, and eat lightly steamed. Delicious with olive oil, garlic and fresh parsley. This variety has black seeds when mature.
SKU: BEAN-YEL [Seeds/pkt: 40]

BEAN - ZEBRA
Sow early Spring (In Geraldton, Autumn or Spring). Also known as ‘Scotia’ bean, a stringless 'pencil-pod' climbing bean with thin speckled purple pods around 12cm long and 'zebra' stripe patterns on seeds. Pick once pod reaches full size and best eaten as a green bean lightly steamed.
SKU: BEAN-ZEB [Seeds/pkt: 40]
BROAD BEAN - LEN'S LONGPOD
Sow mid Winter to Spring.
Large 220mm long, green longpod variety saved since 1993 by Len from Jurien Bay, Western Australia.
Up to seven 30mm flat seeds per pod. Young beans can be steamed and eaten whole.
Pruning plants before they flower promotes a bushy habit reducing their overall height and the need for staking.
SKU: BROA-LLP [Seeds/pkt: 18]

BROAD BEAN - NICK KLEIN'S
Sow early Winter to Spring (In Geraldton, May to June) A light brown seeded heirloom variety from Holland which has been acclimatised and grown in Perth for the last 50 years by Nick Klein. The beans can be picked when mature and steamed or left to dry on the plant, harvested and processed as dried beans. The young pods can also be harvested, steamed and eaten whole as green beans. Plant seeds 500mm to 800mm apart.
SKU: BROA-NIK [Seeds/pkt: 30]

BROAD BEAN - PERUVIAN EMERALD
Sow mid Winter to Spring.
A green seeded broad bean with 3 to 4 seeds per pod. It sets seed even in warmer winter areas. Good disease resistance and prolific bearer. Whole pods can be eaten immature as steamed greens or when more mature, shelled beans (still soft) as steamed beans. Dry beans can be soaked and cooked in bean salads, or substituted for kidney or borlotti beans in Italian and Mexican dishes.
SKU: BROA-PEM [Seeds/pkt: 33]

BROCCOLI - VERDANTE
Sow early Autumn.
The flowering buds and stems of this plant are harvested and eaten fresh or stemmed. In warmer climates this plant lasts for several years. This variety produces one large head then on-goingly produces multiple small flowering heads. Sowing early autumn in the midwest will allow the large heads to mature before the winter cycle of aphids.
SKU: BROC-VER [Seeds/pkt: 120]
**CALENDULA - ORANGE FLOWERED**

Sow end of Winter - Autumn.
Brilliant orange flowered medicinal plant. Petals harvested, dried can be made into an antiseptic salve.
Petals can be eaten and look stunning when drizzled with olive oil in a salad.

**SKU:** CALE-ORA [Seeds/pkt: 150]

---

**CAPE GOOSEBERRY - PERUVIAN GROUND CHERRY**

Sow Spring (In Geraldton, sow anytime).
Hardy sprawling bush 1.5m wide & 1m tall. Sweet yellow berry fruit can be harvested when jacket wrapping is papery dry. Fruit can be eaten fresh or made into jam. If left to dry on the plant, fruit make delicious sultanas. Living for 3 years, plant can be trained as a vine and responds well to pruning.

**SKU:** CAP-GOOS [Seeds/pkt: 100]

---

**CAPSICUM - CENTINEL**

Sow Spring.
(In Geraldton, Autumn-Spring).
An excellent flavoured sweet capsicum with long tapered chilli shape fruit to 130mm, turning red when ripe.
Prolific variety with records of up to 700 fruit per plant.

**SKU:** CAPS-CEN [Seeds/pkt: 30]

---

**CAPSICUM - JAPANESE**

Plant Spring.
Prolific variety with large sweet fruit. Sow in a rich soil and keep moist.
Fruit will be smaller if nutrients are inadequate. Large leaves help protect fruit from sunburn.
May benefit from filtered shade in summer. Pick fruit when full size, either green or later when red.

**SKU:** CAPS-JAP [Seeds/pkt: 30]
**CARROT - ALL SEASONS**

Sow Autumn-Spring in warm climates. All year in cool climates. Summer in cold climates. Productive carrot suitable for wide range of climates with long 20cm orange coloured root and good flavour. Sow directly in long furrows to 5mm in friable soil. Cover and firmly press soil. Stagger sowing fortnightly for continual harvest. Keep weed free and soil moist. Matures in 65 to 80 days. Thinned carrots can be eaten as ‘baby’ carrots.

SKU: CARR-ALL [Seeds/pkt: 900]

---

**CATNIP - WHITE FLOWERING**

Plant Spring, (In Geraldton, Autumn). Catnip is drought tolerant and often perennial. The mint-like scent of the bruised leaves of this herb is said to attract cats and deter rats. It stands 1/2 m high and its white flowers are a good bee attractant for pollination when grown around in orchards and vegetable gardens. Young shoots can be used in salads.

SKU: CATN-WHI [Seeds/pkt: 45]

---

**CAULIFLOWER - SNOWBALL**

Sow Autumn-Winter. Seed into punnets and transplant in 3-4 weeks or direct sow in ground. Snowball has a firm white head and is a good variety for warmer areas. As the head matures tie outer leaves together over the head to protect head from yellowing in the sun. Matures in 65-70 days.

SKU: CAUL-SNO [Seeds/pkt: 80]

---

**CELERY - GOLDEN SELF-BLANCHING**

Sow Winter. This variety has very pale golden-yellow leaves and stems. It is a compact variety with stringless stems and a delicate flavour. Best eaten young and when grown in blocks rather than rows natural blanching will improve the flavour.

SKU: CELE-GOL [Seeds/pkt: 200]
CELTUCE - NARROW LEAF

Sow Spring.
(In Geraldton, sow Autumn).
Also called 'asparagus lettuce' this chinese vegetable is left in the ground until it develops a stem length of 30cm. They are then peeled and thinly sliced before being stir fried. The hearts can also be eaten like small lettuces.

SKU: CELT-NAR [Seeds/pkt: 200]

CHAMOMILE - GERMAN

Sow Autumn.
This annual Chamomile grows to 600mm and flowers prolifically. Dried flowers are used to make a calmative herbal tea. Leaves if infused in water (1 cup of leaves to 1 litre of water) are a preventative for the ‘damping off' fungus in young seedlings. Drench seedlings with this preventative when first planted.

SKU: CHAM-GER [Seeds/pkt: 2000]

CHARD - ITALIAN BLEDON SPINACH

Plant early Winter.
This wonderfully sweet lime green leaf vegetable will supersede all other silverbeets once you taste it. It is so sweet it makes a great lettuce substitute. A vigorous and fast growing variety, seeding in its first summer in Geraldton.

SKU: CHAR-ITA [Seeds/pkt: 100]

CHICORY - GREEN CURLED ENDIVE

Sow Autumn or Spring.
An annual plant grown like lettuce. Its Leaves are often tied or covered after 2 months with dark pots to blanch and make them less bitter. They are then picked as salad greens. If left to flower, the plants produce long spikes laced with delightful blue flowers. Will tolerate full sun or part shade.

SKU: CHIC-GRE [Seeds/pkt: 250]
**CHILLI - BANOS RED**
Sow Spring.
Extremely attractive colourful upright pointing fruit 30mm long and 15mm wide.
Bush grows to 400mm with deep green foliage and purple flowers. The purple fruit turns orange then red when ripe.

**SKU:** CHIL-BAN [Seeds/pkt: 40]

---

**CHILLI - INFERNO**
Sow Spring (In Geraldton, sow Autumn).
Upright red fruit 40mm long and 10mm wide tapering to a point. A compact bush form with a long heavy fruiting period. Exhibits nematode tolerance.

**SKU:** CHIL-INF [Seeds/pkt: 40]

---

**CHILLI - RED THAI LONG**
Sow Spring.
(In Geraldton, sow Autumn).
Bush grows to 600-700mm with long thin green fruit 80mm long and 5mm wide with a tapering point, that turns red when ripe.
Slight circular ridging around the fruit. Hot, pungent and flavourful fruit that dries well.

**SKU:** CHIL-RTL [Seeds/pkt: 40]

---

**CHILLI - ST HELENA ORANGE**
Sow Spring
(In Geraldton Autumn).
These strong plants produce a tapered 75mm long hot chilli that change colour to a deep orange when ripe.
Plants can also be grown from root suckers.

**SKU:** CHIL-SHO [Seeds/pkt: 40]
CHILLI - YELLOW PERUVIAN

Sow Spring.
(In Geraldton, Spring to Autumn).
This bush produces attractive, bright yellow, tapered chillies approx. 50mm long.
A rare Peruvian cultivar for the gourmet palate. A prolific bearer over two years in frost free areas.
A very hot, flavoursome chilli suited to many red bean dishes.

SKU: CHIL-YEL [Seeds/pkt: 40]

CORIANDER - CHINESE

Sow Autumn.
This small seeded variety is preferred in Thai cooking. The ground roots are also used.
Coriander powder is made from the dried seeds. Leaves are used extensively in Indian cooking.

SKU: CORI-CHI [Seeds/pkt: 120]

CORIANDER - THAI SERRATED LEAF

Sow Spring.
(In Geraldton, anytime).
Once you have cooked with this herb, you will make the effort to grow it.
A small perennial thistle-like plant whose leaves and root have a strong and agreeable coriander flavour.
It is a main ingredient in 'sofrito', a West Indian seasoning made of Parsley, Chilli and Thai Coriander.

SKU: CORI-THA [Seeds/pkt: 50]

CORN - CHINESE MINI

Sow Spring (In Geraldton produces a late crop if sown early-mid March).
Plants reach 1.5m and tend to be multiple stemmed. Each plant produces approximately 15 cob.
These can be harvested when premature (silks are pink and eaten as chinese mini corn. If let to mature, the small red kernels may be used as popcorn. If saving seed, cull any over sized plants.

SKU: CORN-CHI [Seeds/pkt: 100]
CORN - MEXICAN SWEETCORN
Sow Spring
(In Geraldton - late Winter or late Summer).
A delicious variety not exhibiting the insipid sweetness of many hybrids.
250mm long kernels with 2 to 3 cobs per plant. Seeds are a golden yellow colour. A characteristic of this variety is that the seeds dry flat, this is not an indication of viability. 4 months to maturity.
SKU: CORN-MEX [Seeds/pkt: 140]

CORN - MULTI-COLOURED AZTEC
Sow Spring - Summer.
This plant grows to 2.5m high and produces a beautiful cob speckled with white red, blue and yellow kernels.
This corn can also be eaten if harvested in its immature stage. Cobs make excellent dried ornaments.
Dried seeds are usually ground to make a cornmeal for breads and corn chips.
SKU: CORN-MAZ [Seeds/pkt: 140]

COWPEA - BENNY’S MOON
Sow Spring (In Geraldton, early Spring).
Heat tolerant, vigourous climber up to 3m along trellis or wire fence.
Highly productive, with up to 16 light browned coloured peas per pod. Short lived Perennial in warmer, frost-free climates.
SKU: COWP-MOO [Seeds/pkt: 30]

COWPEA - BLACK-SEEDED THAI
Sow Spring.
(In Geraldton, early Spring).
This is a summer bush bean which needs light shade through the hotter months over 40°C.
It has been highly productive with little soil improvement. Very good as a stringless green bean or a dries bean.
SKU: COWP-BLA [Seeds/pkt: 30]
COWPEA - BURKINO FASO
Sow Spring. This extremely heat hardy cowpea from Africa has adapted well to the Geraldton climate with irrigation. Eat young beans as a steamed vegetable or dried seeds as a pulses.

SKU: COWP-BUR [Seeds/pkt: 30]

COWPEA - PURPLE HULL PEA
Sow Spring (In Geraldton, early Spring). This summer bush bean needs light shade through the hotter months over 40°C. It has been highly productive with little soil improvement. Very good as a stringless green bean when young purple pods are picked. Dried seeds can be soaked overnight, cooked and used in casseroles.

SKU: COWP-PUR [Seeds/pkt: 60]

CRESS - GARDEN
Sow Spring to Autumn. (In Geraldton, Autumn). Young leaves can be regularly picked to provide a tangy, peppery taste as a salad herb or garnish for omelettes, soups and sandwiches. Seeds suitable for sprouting. Prefers a shady spot if planted towards the hotter months. Maturity in less than four weeks.

SKU: CRES-GAR [Seeds/pkt: 100]

CUCUMBER - DONGARA LONG WHITE APPLE
Sow Spring. Climbing plant, fruit 150 to 200mm long. White coloured flesh with white skin. This apple type of cucumber has textured surface. Heirloom variety from Dongara, Western Australia.

SKU: CUCU-DON [Seeds/pkt: 12]
**DILL - CULINARY**

Sow Autumn.
Seed commonly used a flavouring for pickles and fish. A good orchard plant it grows to 1.5m, has huge parachute shaped flower which attract many garden pest predators. Delightful green soft fern-like foliage often picked, dried and sold as 'Dill Tips'.

**SKU:** DILL-CUL [Seeds/pkt: 100]

---

**EDIBLE CHRYSANTHEMUM - SERRATED LEAF**

Sow Spring.
(In Geraldton, Autumn).
Sometimes referred to as 'Chop Suey Greens'. Leaves are eaten in Stir fries in Chinese food.
This annual plant grow to 1.5m and has masses of 30-40mm yellow chrysanthemum flowers.

**SKU:** EDIB-CHR [Seeds/pkt: 80]

---

**EGGPLANT - LAOS TIGER GREEN STRIPE**

Sow Spring (In Geraldton, sow anytime).
A non-bitter heirloom eggplant with pleasant flavour from Laos. Standing 1.5m tall it has small round attractive fruit 50mm in dia. Cream-coloured fruit with green "tiger stripes" on upper half. When fruit is picked at this stage no pre-processing is needed, cook entire fruit with skin. Bears prolifically over 3-4 yrs. Tolerates a light frost.

**SKU:** EGGP-LAO [Seeds/pkt: 50]

---

**EGGPLANT - PINTONG LONG IMPROVED**

Sow Spring.
Improved strain of a Taiwanese cultivar. Light purple fruits 200-250mm long 25-50mm wide.
Excellent for slicing and pickling. Very early productive upright plants, up to 20 fruits per plant. Resistant to high temperatures and humidity.

**SKU:** EGGP-PIN [Seeds/pkt: 50]
**FENNEL - PERENNIAL**
Sow Winter-Spring.
Perennial herb to 2m with soft foliage and sweet anise flavour. Young stems and leaves are used as a garnish and seasoning herb and traditionally for its many medicinal properties including aiding digestion and calming nerves. Plant in well drained soil.

**SKU:** FENN-PER [Seeds/pkt; 100]

---

**FENUGREEK - MARDA**
Sow direct into the ground after the shortest day. A legume which grows and looks similar to a bush bean. Dried seeds are used ground in Indian curries or sprouted in salads. Young leafy shoots are also used in curries. Boiled seed yields a yellow dye.

**SKU:** FENU-MAR [Seeds/pkt; 50]

---

**FEVERFEW - BACHELOR'S BUTTONS**
Sow Autumn or Spring. A stunning 500mm high daisy-like flowering plant with dainty fern-like leaves. An excellent general companion plant due to it's pest predator attracting flowers and strong smelling leaves. Three to five fresh leaves between slices of bread said to reduce migraines.

**SKU:** FEVE-BAC [Seeds/pkt; 75]

---

**GARLIC CHIVES - WHITE FLOWERING**
Sow Spring (In Geraldton, all year round). Sow in trays. Cover with 5mm soil, keep moist and transplant at 4-6 weeks into garden or large pot. Attractive drought hardy white flowering variety. Excellent garlic flavoured leaves are used raw and in cooking. Can be harvested continuously by breaking off leaves as they are needed. Plants can be easy divided once established.

**SKU:** GARL-WHI [Seeds/pkt; 50]

---

**GOURD - PERHENTIAN ISLAND**
Plant Spring. A vigorous running climbing vine similar to a pumpkin. Can be grown up a trellis or along the ground. Keep well aerated to avoid powdery mildew. This is one of our most mildew tolerant strains. White flowers produce young fruit which can be eaten curried, grated into fritters, even pickled.

**SKU:** GOUR-PER [Seeds/pkt; 12]
GOURD - YARD LONG

Plant Spring.
Also known as New Guinea Butterbean, is a pumpkin like climbing vine, fruits are up to 1m long or more. Harvest when 150-200mm long. Eaten like zucchini they have a flavour similar to cooked green beans. Best grown on a trellis for blemish free fruit. Dried, they make great long musical rattles (maracas').

SKU: GOUR-YAL [Seeds/pkt: 12]

HENNA - GAZA

Sow Spring.
Wind and heat tolerant deciduous bush growing to 2m with a mass of white flower umbels similar to an elderberry. The leaves can be dried and ground to a powder which is mixed to a muddy paste to dye and condition hair. A highly prized plant in the middle east.

SKU: HENN-GAZ [Seeds/pkt: 120]

INDIGO - UPRIGHT INDIGO

Sow Spring.
Perennial semi-tropical plant which grows to one metre high and famed for its rich blue dye since ancient times. Indigo is a legume with small purplish flowers in summer. In cooler climates grow in a warm north facing position.

SKU: INDI-UPR [Seeds/pkt: 50]

LABLAB BEAN - RONGAI

Sow Spring-Summer.
Heat loving and drought tolerant summer growing legume it is used extensively as a green manure cover crop. The leaves make an excellent fodder. In heavier soils it can be grown without summer rainfall providing there is adequate dew.

SKU: LABL-RON [Seeds/pkt: 50]
LABLAB BEAN - SEVEN YEAR - HIGHOWORTH
Sow Spring.
Strong summer grower and a wind tolerant climber (when tendrils are wound around a trellis). Tip vines to encourage outward growth. Young tender pods & immature seeds are eaten as a fresh bean. Leaves are eaten fresh or dried, as spinach. Short days trigger flowering. The delicious flowers are best eaten raw in salads. Mature seeds must be boiled before eating to breakdown a toxic cyanogenic glycoside in their coat.
SKU: LABL-HIG [Seeds/pkt: 40]

LEEK - PERENNIAL BUNCHING LEEK
Sow Autumn.
Grow in full sun. Produces a large mother leek that can be harvested leaving the surrounding smaller leeks to mature and harvest as needed. Leeks may be divided and you’ll have an on-going leek supply. This leek is often grown by bulblets, in Geraldton it seeds in March, at other latitudes in may not seed. Store seed in fridge to extend its viability time.
SKU: LEEK-PER [Seeds/pkt: 60]

LEGUME SHRUB - DESMANTHUS
Sow Spring Summer.
Bushy wind hardy heavy nitrogen fixer growing up to 2m. It has small soft leaflets with a 22% protein content. As a browse fodder shrub it is very palatable and recovers after heavy grazing. It self-seeds vigorously and could become troublesome if not managed by grazing. Poultry love eating young self sown seedlings.
SKU: LEGU-DES [Seeds/pkt: 30]

LEGUME SHRUB - LEUCEANA
Sow Spring/Summer.
2m tall legume tree usually grown in the tropics as cattle fodder. Poultry love the seeds. Doesn't like frosts and will survive in rainfall areas down to 450mm but prefers more. This low mimosine strain allows animals to access leaf protein similar in value to lucerne. Good nurse trees in orchards. To germinate, pour boiling water over seed and soak 24 hrs then plant swollen seeds.
SKU: LEGU-LEU [Seeds/pkt: 20]
LEGUME SHRUB - SESBANIA - YELLOW PEA SHRUB
Sow Spring/Summer.
(In Geraldton, Anytime).
Grows up to 3m in one year, this short lived legume shrub provides a good short term windbreak/screen if planted as a hedge. An animal fodder plant chickens feast on the abundant self sown seedlings beneath older trees. Seeds should be scarified or have boiling water poured over them and left to soak for 24 hours before planting.
SKU: LEGU-SES [Seeds/pkt: 30]

LEMON BALM - IRANIAN
Sow Spring (In Geraldton, Autumn).
An attractive aromatic annual herb for your garden. Hosts beneficial insects and bees forage it’s purple flowers. Use leaves either fresh or dried as a herbal tea.
SKU: LEMO-IRA [Seeds/pkt: 60]

LETTUCE - BROWN ROMAINE
Sow Spring.
(In Geraldton, Autumn to Winter).
A frilly open leaved lettuce with glossy brownish-red leaves. It has a crisp texture and a good flavour with a hint of sweetness. This is a cos lettuce, the leaves can be picked as needed.
SKU: LETT-BRO [Seeds/pkt: 200]

LETTUCE - GOLDRUSH
Sow Spring
(In Geraldton, Autumn to Winter).
A spectacular golden oak-leaved type lettuce. Often has a diameter of 500mm and dome shaped.
The leaves can be picked as needed. In Geraldton is best grown in part shade for best flavour.
Good companion with onions and beans.
SKU: LETT-GOL [Seeds/pkt: 200]

LETTUCE - LIGHT GREEN WAVY LEAF
Sow Spring
(In Geraldton, Autumn to Winter).
A sweet lettuce with lovely lime green leaves to 400mm in length. Leaves can be individually harvested from the base of the plant providing an on-going lettuce supply.
Our fastest growing lettuce.
SKU: LETT-LGW [Seeds/pkt: 200]
LETTUCE - PURPLE OAK
Sow Spring.
(In Geraldton, Autumn).
A vigorous late seeding French Red Lettuce with an oak leaf shaped deep purple and green leaves.
The outer leaves can be regularly picked and eaten after 6 weeks from sowing.
SKU: LETT-POA [Seeds/pkt: 200]

LETTUCE - RABBITS EAR
Sow Spring.
(In Geraldton, Autumn to Winter).
Upright growing, ear-shaped, open hearted leaved plant. This is a cos lettuce that can have it's leaves picked as needed.
Delicious sweet variety that produces over the Winter and spring months.
Good companion with onions and beans.
SKU: LETT-RAB [Seeds/pkt: 200]

LETTUCE - RED BATAVIAN
Sow Spring.
(In Geraldton, Autumn to Winter).
Very distinctive French lettuce with red/brown ruffled leaves that are sweet and juicy without bitterness.
Plants begin to open like 'loose headed' lettuces becoming compact and heavy at full maturity.
SKU: LETT-RED [Seeds/pkt: 200]

LUFFA - ANGLED LUFFA
Sow Spring.
Also known as Chinese Okra, a vine with prized and distinctive fluted fruit for Asian cooking and when dried as a body scrub. Flowers, small immature fruit and young leaves can be steamed and stir fried.
As fruit matures it becomes bitter. Vine needs well fertilised moist soils, suitable climbing structure and shade during hot summers.
SKU: LUFF-ANG [Seeds/pkt: 12]

MARIGOLD - AFRICAN - CRACKER JACK
Sow Autumn. Brighten up your vege garden with these brilliant orange / yellow flowering annuals. Planted with tomatoes, eggplants and other root knot nematode susceptible vegetable crops in sandy soils. They help reduce nematode pests by fumigating the soil with their root exudates allowing your veges to grow healthier and produce for their full fruiting time.
SKU: MARI-CRA [Seeds/pkt: 100]
MARIGOLD - MEXICAN
Sow end of Winter - Autumn. Tall growing marigold used to fumigate soil to reduce nematodes. If grown for a full season, it can be effective for up to 3 years. The mulched leaves are a useful pest deterrent. An essential companion to tomatoes and capsicums. The foliage can cause skin irritations.
SKU: MARI-MEX [Seeds/pkt: 200]

MARULA - AFRICAN MARULA TREE
Sow Spring. Germinates in 2 wks. Drought-tolerant deciduous shade tree from South Africa can grow 9 to 18m tall. Edible yellow round fruit used to produce 'Amarula' liqueur. Fruit contains large hard seed covered by jelly-like flesh. Seed holds 1-3 embryos which yield high protein oil. To germinate remove the 'corks' which cover the embryo cavities. Can be drilled out (8-10mm bit) in a vice, take care not to go too deep and damage the root tip.
SKU: MARU-AFR [Seeds/pkt: 3]

MELON - MINNESOTA MIDGET ROCKMELON
Plant Spring. Vigorous bushy plant rather than a running vine. Fruit have a delicious balanced flavour. Fruit are 100-125mm round with deep orange flesh. They are suitable for one person, one meal.
SKU: MELO-MIN [Seeds/pkt: 30]

MINT - KOREAN
Sow all year. Traditionally used in Eastern Asia as dried or fresh leaves for seasoning in meats, salad dressings and as medicinal tea. Growing to 1 metre tall this perennial herb has a distinctive anise flavour. The young leaves and shoots may be boiled and eaten as greens.
SKU: MINT-KOR [Seeds/pkt: 50]
MINT - PALESTINIAN ZARTMANII
Sow all year.
A ground covering perennial herb it has a strong sweet pungent smell and self seeds readily.
This extremely hardy plant is native to the limestone hills in the West Bank in the occupied Territories of Palestine but grows well in most soils.
Sprigs are often put into black tea as a flavouring. It has a pretty pink mauve flower.
SKU: MINT-PZA [Seeds/pkt: 30]

MORINGA - DRUMSTICK TREE
Sow Summer or when soil temp. >25 deg C. Take care not to over-water young seedlings. A frost sensitive deciduous tree, also known as the Horseradish tree, produces long pods used in Asian cooking. Roots are a horseradish substitute while leaves and flowers are consumed raw in salads. Immature pods can be fried or roasted. Young seedlings eaten as a cooked green vegetable.
SKU: MORI-DRU [Seeds/pkt: 7]

MOTHERWORT - COMMON
Sow Spring (In Geraldton, Autumn).
Hardy perennial to 1.5m in cooler climates. Grows as an annual in Geraldton where it self-seeds with strong seedlings during winter. Green fingered leaves and whorls of pink flowers in early summer.
Likes well-drained soil and limestone. Yields a dark green wool dye. A tea from the plant is a relaxing tonic for menopausal changes.
SKU: MOTH-COM [Seeds/pkt: 120]

MUSTARD LETTUCE - MITZUNA
Sow early Autumn.
Sow in punnets and transplant as seedlings at 3-4 weeks. Highly productive and hardy open-leaved frilled green that looks like decorative seaweed. This delicious Japanese bred green can be eaten raw, tossed in salads or lightly steamed like spinach. Pick leaves as needed.
SKU: MUST-MIT [Seeds/pkt: 70]

MUSTARD LETTUCE - THAI OYSTER
Sow Spring
(In Geraldton - sow Autumn).
Grown for it's tender, crisp, oyster shaped heart and leaves which are best cooked in stir fries. Cool night temperatures are best for heading.
Full sun during winter is best as the high light intensity encourages tight heading.
SKU: MUST-THA [Seeds/pkt: 70]
**NASTURTIUM - INDIAN CRESS**

Sow Autumn or Spring.
These hardy colourful flowers are annual sprawling plants. The poorer the soils they grow in, the more prolific the flowers. The orange flowers have a peppery flavour and are often used in salads. The scent from the orange flowers repel aphids. The green seeds are often harvested and pickled then used as a caper substitute. These plants self sow every year.

SKU: NAST-IND [Seeds/pkt: 40]

---

**OKRA - LADY'S FINGER**

Sow Spring/Summer (In Geraldton, Spring).
A summer annual, keep well watered and fertilised. Harvest fruit when young before turning woody. Can be sliced and fried, good in tomato-based recipes.

SKU: OKRA-LAD [Seeds/pkt: 40]

---

**ONION - HEBREW BROWN**

Brown skinned onion with good keeping qualities. Best sown in a tray covered with ~5mm soil. Transplant seedlings when stems 3-6mm thick and only cover up to the small white part of the stem with soil. If seed saving, you need several plants to get good seed. Onion varieties grown at the same time will cross. Will not cross with leeks, chives or garlic chives.

SKU: ONIO-HEB [Seeds/pkt: 200]

---

**OREGANO - GREEK**

Sow Autumn-Spring (In Geraldton all year)
Prostrate hardy, perennial culinary herb that prefers a warm position with free draining soil. Pick a few leaves for your tomato based pasta sauces and casseroles. Suitable in a pot but avoid over-watering. Provide part shade and additional summer watering in hot, dry climates.

SKU: OREG-GRK [Seeds/Pkt:50]

---

**OREGANO - PALESTINIAN ZA’ATAR**

Plant Spring.
The leaves and flowering tops of this one metre tall perennial herb are used as a seasoning.
In the Middle East, Za’atar is made from the dried herb which is mixed with sumac and sesame; this is eaten with flat bread and olive oil. This variety has a zingy savoury flavour reminiscent of a blend of thyme, oregano and marjorum.

SKU: ORIG-SYR [Seeds/pkt: 50]
**PARSLEY - EGYPTIAN**

Plant anytime
(In Geraldton - early Winter to Spring).
One of the sweetest large leaved varieties of parsley. Used extensively in the mediterranean salad tabouleh.
It is extremely heat and quite drought tolerant.

**SKU:** PARS-EGY [Seeds/pkt: 200]

---

**PARSLEY - ITALIAN**

Plant early Winter.
Flat, glossy deeply cut leaves. Excellent strong aromatic taste. A vigorous erect plant, many people prefer this variety's flavour over the triple-curled. It tends to be a more heat tolerant that triple-curled. This variety grows for two years and is drought tolerant. 78 days to maturity.

**SKU:** PARS-ITA [Seeds/pkt: 200]

---

**PASSIONFRUIT - HAWAIIAN YELLOW**

Sow Spring or Autumn.
Seeds germinates quickly within 2 weeks when soil is warm. Fast growing climber nematode tolerant with bright yellow oval fruits that drop off the plant when ripe. The fruits ~60mm in diameter are sweet with a nice acid balance. Keep soil moist and fertilised. Makes a great fruit leather or a superb passionfruit-pumpkin chutney.

**SKU:** PASS- HAW [Seeds/pkt: 15]

---

**PASSIONFRUIT - LOVE-IN-A-MIST**

Plant Spring.
A vigorous, fast growing climber during the warmer months. Where cold winters prevail, grow this plant as an annual. It produces a small yellow, soft-skinned fruit (15-20mm) with a pleasant flavour. Both the unripe green fruit and leaves contain hydrocyanic acid which shouldn't be eaten. Extremely wind-tolerant climber and poultry love the ripe fruit.

**SKU:** PASS-FOE [Seeds/pkt: 20]
PASSIONFRUIT - PAWPAWADILLA
Plant Spring.
A perennial climbing variety of green passionfruit from Zimbabwe. It has a delicate three fingered leaf, hardy to wind and extreme heat. The fruit are sweet and non-acidic with a soft skin that peels off the fruit easily. Fruit ~50mm in diameter. A good nematode rootstock for Passiflora edulis.
SKU: PASS-PAW [Seeds/pkt: 20]

PASSIONFRUIT - TENNIS BALL PINK
Sow Spring/Summer.
Seed will take 2-4 weeks to germinate @ 25 degrees. Large round pink/purple skinned fruit on a vigorous productive vine producing through winter in Geraldton. Excellent flavoured pulp. Allow skin to wrinkle slightly to attain full sweetness. Will grow better if protected from strong winds.
SKU: PASS-TEN [Seeds/pkt: 15]

PEA - JAPANESE AND OREGAMI
Sow Spring (Geraldton - Autumn).
These two semi-dwarf climbing pea varieties require a 1m trellis. They are both heavy bearers and have a sweet flavour. Oregami is a snow pea which exhibits mildew tolerance and when grown with Japanese peas gives a them a degree of protection. If picked young, the Japanese pea pods can also be eaten. Both varieties have white flowers and light green seeds. Oregami has the wider flat pod.
SKU: PEA-JAO [Seeds/pkt: 50]

PEA - MEDUSA
Sow Spring (In Geraldton, Autumn).
Medusa is an excellent shelled pea growing to one meter high. This pea is a stable cross developed for it mildew resistance. It has few leaves and many tendrils hence it likeness to Medusa. This white flowering variety typically contains six green seeds per pod. Seeds are wrinkled when dried. Mature in 80 days.
SKU: PEA-MED [Seeds/pkt: 60]

PEA - PURPLE PODDED
Sow Autumn-Spring (In Geraldton Winter)
Climbing pea to 2m tall with attractive purple coloured pods and pink-purple flowers. Has been a reliable bearers in our midwest climate. Pods and peas can be eaten when young as a snow pea or as pea while when pod is mature.
SKU: PEA-PUP [Seeds/pkt: 50]
POPPY - FLANDERS
Sow Autumn.
A brilliant red flowering poppy. The centre of each petal has an exquisite black pattern reminiscent of a Japanese painting.
These beautiful winter/spring flowers self-seed every year, they glorify everywhere they grow.
SKU: POPP-FLA [Seeds/pkt: 700]

PUMPKIN - PAWPAW
Sow Spring (In Geraldton, Winter)
90 days to maturity. Orange skin with orange flesh. Fruit shaped like a pawpaw. Nutty sweet flavour. Medium sized climber.
Exhibits good disease and mildew resistance. Can be grown through the winter in warmer climates.
Does not like hot weather.
SKU: PUMP-PAW [Seeds/pkt: 15]

PUMPKIN - SWEET GRAMMA
Sow Spring
(In Geraldton, sow late Winter).
Remember that delicious pumpkin pie Grandma used to make? Well, this is one of the gramma (butternut) varieties used. It has an extremely sweet yellow flesh and also makes a nice sweet curry. A large vigorous climber it needs lots of fertilizer and moisture during its growing season. Pick when stalk dries. Good keeper.
SKU: PUMP-SWE [Seeds/pkt: 15]

ROCKET - ARAGULA
Sow Spring
(In Geraldton, Autumn to Winter).
Young leaves have a distinct, spicy-oak flavour and are eaten raw in salads or sautéed in garlic and olive oil.
Popular ingredient of mescalin. Flowers make a good garnish & the seeds contain a mustard oil substitute.
SKU: ROCK-ARA [Seeds/pkt: 100]

ROSELLA - HIBISCUS FLOWER
Sow Spring/Summer
(In Geraldton, Spring).
A summer annual with leaves that can be harvested and cooked as a spinach substitute.
The bright red flower sepals can be harvested and dried, and used as a delicious tea with high Vitamin C content when infused in boiling water.
SKU: ROSE-HIB [Seeds/pkt: 35]
**SNAKE BEAN - BROWN SEEDED**

Sow Spring - Summer. Sometimes known as the Yard Long Bean, this climbing variety is heat tolerant but best grow in part shade in hot dry regions. It is not cold tolerant. Mature bean pods can grow over 700mm long, but should be regularly harvested when young and tender. Beans can be eaten steamed or stir fried.

*SKU:* SNAK-BRO [Seeds/pkt: 25]

---

**SNAKE BEAN - RED SEEDED**

Sow Spring - Summer. Also known as the Yard Long Bean. This vigorous red seeded variety is shade and heat tolerant providing it is kept moist. Bean pods up to 400mm should be regularly harvested when young and tender. It can be eaten fresh in its pod or harvested after drying on the vine as a dried bean.

*SKU:* SNAK-RED [Seeds/pkt: 25]

---

**SNAKE BEAN - TWO-TONE**

Sow Spring - Summer. Red and white seeded climbing variety is heat and shade tolerant. It needs hot weather to produce and likes some shade on extra hot days. Bean pods up to 600mm should be regularly harvested when young and tender. They can be eaten fresh in salads or steamed. Snake bean have a delicious sweet asparagus like flavour.

*SKU:* SNAK-TWO [Seeds/pkt: 25]

---

**SNOWPEA - CHINESE PINK**

Sow Spring (In Geraldton, early Winter). Chinese Pink is a heavy bearing snowpea variety with delicate pink flowers producing sweet pods when young, or shelled peas later in the season. Sprouted dried peas make excellent salad sprouts.

*SKU:* SNOW-CPI [Seeds/pkt: 60]
SNOWPEA - CHINESE PINK & SUPER NOVA
Sow Spring (In Geraldton, early Winter). Two great climbing varieties in one packet. Super Nova has white flowers and larger edible pods with a vigorous character and mildew resistance. Chinese Pink is a heavy bearing variety with delicate pink flowers producing sweet pods when young, or shelled peas later in the season. Sprouted dried peas make excellent salad sprouts.
SKU: SNOW-CPS [Seeds/pkt: 60]

SNOWPEA - GIANT
Sow Spring - Summer (In Geraldton, Autumn). The Giant variety is a traditional tall climbing snowpea with sweet pods that can be eaten whole or shelled and enjoyed raw. Best grown up along a trellis or fence line.
SKU: SNOW-GIA [Seeds/pkt: 60]

SNOWPEA - GIANT AND DELTA MATILDA
Sow Spring - Summer (In Geraldton, Autumn). Mix of two varieties to reduce powdery mildew spread. The Giant variety is a traditional tall climbing snowpea with sweet pods that can be eaten whole or shelled and enjoyed raw. Plant mildew resistant Delta Matilda is a vigorous stable cross with red/pink flower, green-brown seeds. Plant a either side of Giant variety.
SKU: SNOW-GDM [Seeds/pkt: 70]

SNOWPEA - SUGAR SNAP
Sow Spring (In Geraldton, Sow Autumn). Sugar snap pods remain sweet, crisp and tender until quite large. A favourite on our farm. This vigorous NZ variety with 2m vine needs a good support, matures in 70 days and freezes well.
SKU: SNOW-SSN [Seeds/pkt: 60]
SORGHUM - MAYO BROOM CORN

Sow Spring.
Tassel spikes are used to make brooms. Perennial plant in frost free area. Seeds, leaves and stalks can be cut regularly and used as a fodder. Provides a natural trellis for climbers and good shade when planted amongst other summer crops.

SKU: SORG-MBC [Seeds/pkt: 50]

SPINACH - JAPANESE

Sow Autumn.
This is a sweet variety of English spinach. It is an annual prickly seeded variety with lobed leaves and more cold and heat tolerant than traditional smooth seeded varieties. This delicious fast growing spinach doesn't leave the unpleasant after effects on teeth like Silverbeet and is hard to walk past in our garden without nibbling!

SKU: SPIN-JAP [Seeds/pkt: 70]

SPINACH - RED MALABAR

Plant Spring
Fast growing Asian vine with spinach tasting leaves and young stems which can be eaten as a salad or added to stir fry dishes. Like lots of moisture, heat and enriched soil. Provide trellis or climbing framework to keep leaves from covering garden bed. Perennial in tropical climates and warmer humid climates. Otherwise will grow as an annual.

SKU: SPIN-RMA [Seeds/pkt: 40]

SUNFLOWER - GERALDTON GIANT

Sow Spring (In Geraldton, anytime). Large plant over two and half metres tall with masses of small headed flowers. Drought tolerant oil variety, best on poor soils. During hot summers they cast a wonderful shade in vegetable gardens and serve as good decoys for pink and grey galahs. Chickens love eating the oily seeds. Sunflowers cross between varieties.

SKU: SUNF-GER [Seeds/pkt: 35]
**TOMATILLO - GRANDE VERDE**

Sow Spring.
An annual plant growing to 0.5m with lobed fruit encased in jackets similar to Cape Gooseberries.
The 30mm fruit berry is harvested when soft. Eaten cooked with tomatoes and is the original 'taco' flavour.

**SKU:** TOMT-GRA [Seeds/pkt: 30]

---

**TOMATO - BLACK Krim**

Sow Autumn-Spring.
This large tomato is one of the beefhearts. These unusual shaped tomatoes are called the 'crinklelies'.
Their flesh is a maroon-purple colour and meaty texture with a tasty flavour. The vine is vigorous and needs staking.

**SKU:** TOMA-KRI [Seeds/pkt: 60]

---

**TOMATO - BLACK RUSSIAN**

Sow Spring
(In Geraldton, early Autumn to Spring).
A staking vine bearing round 60mm chocolate-brown fruit when ripe.
This variety was revived from some old seed found in the East Gippsland Organic Association Seedbank. This is a rare heirloom variety of salad tomato.

**SKU:** TOMA-BRU [Seeds/pkt: 50]

---

**TOMATO - BROAD RIPPLE YELLOW CURRANT**

Sow Spring (In Geraldton, Autumn). A vigorous 3m tall vine that requires staking! and produces a mass of 10mm round sweet yellow fruit in grape like bunches. Unlike other tomatoes they won't split if left to dry on the vines and hence do not attract fruit fly. Prolific self-seeder and our most drought tolerant tomato variety.

**SKU:** TOMA-BRY [Seeds/pkt: 60]

---

**TOMATO - BUDIAH**

Sow Spring
(In Geraldton, early Autumn to Spring).
This is a strong bush tomato which is great for small spaces. It is a determinate variety bearing a heavy crop of sweet deep-red rounded fruit. Exhibits some nematode tolerance.

**SKU:** TOMA-BUD [Seeds/pkt: 50]
**TOMATO - GOLDEN SUNRISE**

Sow Spring
(In Geraldton, early Autumn to Spring).
Prolific indeterminate staking variety with excellent low-acid sweet flavour. Gold yellow round fruit, 50mm diameter. 80 days to maturity.

**SKU:** TOMA-GSU [Seeds/pkt: 60]

---

**TOMATO - GREEN ZEBRA**

Sow Spring
(In Geraldton, early Autumn to Spring).
Bears after 80 days from transplanting. Apricot-sized fruit with a greenish lime colour and deep green stripes. The green flesh has a mild pleasing flavour. Indeterminate vine. Good for processing, as well as eating out of hand or in salads.

**SKU:** TOMA-GZE [Seeds/pkt: 60]

---

**TOMATO - INDIAN MAYAN**

Sow Spring
(In Geraldton, early Autumn to Spring).
A short staking variety that bears strongly. Meaty bright red pear shaped fruit, 75mm long that dry and process well. Compact determinate vine.

**SKU:** TOMA-IND [Seeds/pkt: 60]

---

**TOMATO - LEMON BOY**

Sow Spring
(In Geraldton, early Autumn to Spring).
Well flavoured medium-sized, deep globe shaped, lemon-yellow fruit. Vigorous indeterminate vine that needs staking. Resistant to fusarium and verticillium wilts, and nematodes. Originally a hybrid now is a stabilised open-pollinated variety. Maturity from 75 days.

**SKU:** TOMA-LBO [Seeds/pkt: 55]

---

**TOMATO - MAMA LUCIE**

Sow Spring
(In Geraldton, early Autumn to Spring).
Prolific indeterminate vine with good quality yellow fruit to 40mm size. Good foliage cover and multiple disease resistance. This a good salad tomato. Maturity from 85 days.

**SKU:** TOMA-MAM [Seeds/pkt: 60]
TOMATO - PERSIMMON
Sow Spring
(In Geraldton, early Autumn to Spring).
Large, deep, globe-shaped fruit 100mm diameter. Bright orange skin and flesh with solid, meaty flesh and a few seeds. Strong distinctive flavour. Keeping calcium levels up to this variety will reduce blossom end rot. Large indeterminate vine that matures from 80 days. Excellent for slicing.
SKU: TOMA-PER [Seeds/pkt: 50]

TOMATO - PERUVIAN RED CHERRY
Sow Spring
(In Geraldton, early Autumn to Spring).
Heavy bearing variety with delicious small round cherry red fruits. Excellent for eating out of hand. Needs staking.
SKU: TOMA-PRC [Seeds/pkt: 60]

TOMATO - PINK PONDEROSA
Sow Spring
(In Geraldton, early Autumn to Spring).
A large, flattened globe-shaped tomato. The deep pink fruit of excellent flavour is fleshy with few seeds. Very good for drying, slicing, canning or stewing. Needs staking. Bears continuously over a long period.
SKU: TOMA-PPO [Seeds/pkt: 65]

TOMATO - RIO COLORADO
Sow Spring
(In Geraldton, Autumn).
Medium to early in maturity, it produces an intense red plum shaped fruit which makes an excellent sauce or drink. Highly productive, disease resistant variety with firm pulp and few seeds. Better for processing than the fresh vegetable market.
SKU: TOMA-RIO [Seeds/pkt: 60]

TOMATO - SAINT PIERRE
Sow Spring
(In Geraldton, Autumn).
A tasty, medium sized slicing tomato for your plate or sandwich. Cold hardy, indeterminate heirloom variety having origins from St Pierre Island, Newfoundland. Requires staking or a fence line to support it's productive vigour.
SKU: TOMA-SAI [Seeds/pkt: 50]
TOMATO - SAN MARZANO
Sow Spring
(In Geraldton, Spring).
80 days to maturity with elongated flat sided blunt-ended fruit 75mm in diameter.
The meaty fruit stores well, doesn't crack, dries well and processes to a deep red paste. Fruit produced in clusters.
SKU: TOMA-SAN [Seeds/pkt: 50]

TOMATO - STUPICE
Sow Spring
(In Geraldton, Autumn)
A Czechoslovakian variety. Early maturing in 50 days with small/medium 50mm flattened fruit with a glossy red colour, juicy and tasty.
Compact, productive vine with potato like foliage.
SKU: TOMA-STU [Seeds/pkt: 60]

TOMATO - SWEETIE
Sow Spring
(In Geraldton, Autumn).
Vigorous staking vine producing large long bunches of grape like bright red cherry fruit, 12 to 20 fruit per cluster.
Matures in 63 days. Fruit is unusually sweet and flavourful, to 30mm in diameter.
SKU: TOMA-SWE [Seeds/pkt: 60]

TOMATO - THOMPSON GREEN GRAPE
Sow Spring
(In Geraldton, early Autumn to Spring).
80 days to maturity. Distinctive yellow-green round fruit similar to a large green grape, 25mm in diameter.
Sweet and juicy. Strong compact staking vine. Fruit borne in clusters like grapes.
SKU: TOMA-THO [Seeds/pkt: 60]

TOMATO - TIGERELLA
Sow Spring
(In Geraldton, early Autumn to Spring).
A striking orange-striped staking highly productive tomato.
This indeterminate tomato is fleshy with a lovely taste, and is suitable for drying or eaten fresh.
SKU: TOMA-TIG [Seeds/pkt: 50]
**TOMATO - YELLOW PLUM**
Sow Spring
(In Geraldton, early Autumn to Spring).
Small 30mm long ‘sunflower yellow’ teardrop-shaped fruit borne in clusters.
Pleasant mild sweet flavour. Prolific vine. 78 days to maturity.

**SKU:** TOMA-YPL [Seeds/pkt: 50]

---

**WATERMELON - PALESTINIAN PRIDE**

Plant early Spring.
A round soccer ball sized melon. Dark green skin with dense crisp pink flesh.
Wonderful flavour, highly prized variety from a small village close to Nazareth called Jenin.
Local Palestinian people know this as the most famous tastiest heirloom melon in the West bank.

**SKU:** WATE-PAL [Seeds/pkt: 12]

---

**WORMWOOD - SILVER LEAVED**

Sow Summer (In Geraldton, Autumn or early Spring).
Also known as Tree Wormwood. A dense highly ornamental 2m drought shrub with silver to white leaves.
This plant is a very bitter herb indigenous to the Middle East used in mint tea.
In small quantities (in tea) it is believed to have medicinal properties pacifying various kinds of digestion turmoils.

**SKU:** WORM-SIL [Seeds/pkt: 1000]

---

**ZUCCHINI - COCOZELLE**
